

Please review the following tips for using the Adobe Acrobat version of the 2006-2007 Flint-Genesee County Traffic Flow Map.

Staff recommends using the newest version of Adobe Acrobat Reader to view this map. This version includes a tool that allows users to print out or copy selected portions of the map. Previous versions of Acrobat Reader may not include this feature.

To print or copy a selected area:

Use the Zoom In Tool to zoom in on the desired portion of the map.

Use the Hand Tool to move the map around once zoomed in to the desired area.

Once you are zoomed in on the desired area of the map, click the Snapshot Tool icon. Once this icon has been selected, draw a box around the area you would like to copy or print. Click "Okay" in the message box and you are ready to either copy or print.
