Question and Answer:

Q1. 5b. And EtG Alcohol Urine Testing by LC/MS/MS (liquid chromatography/mass spectrometry/mass spectrometry) and should note if specimen is diluted and provide creatinine levels.

5b will require use of a LC/MS/MS lab, is this the intent of the request to require this type of test on every drug test administered?

A1. With respect to the EtG's, drug court is okay with instant EtG testing. Sobriety Court requires process at a lab.

Q2. 6. All urinalysis testing is to be monitored by same gender staff to ensure the samples' integrity.

Is the intent to follow SAMSHA "gender identity" vs sex assigned at birth for compliance with this standard?

A2. The genital needs to match. If they are in the process of a change, they will need to wait until their genital changes before switching.
