SECTION 5 – SCOPE OF WORK

The Genesee County Parks maintains approximately 35 miles of gravel roads and 29 acres of gravel parking lots throughout Genesee and Lapeer Counties. The park roadways are a mix of typical 2-lane gravel roads, narrower single width gravel roads and various size gravel parking lots (some with tight turn radius). Smaller, more maneuverable, application trucks are required to service these small parking lots and narrow roadways. The Genesee County Parks has typically used up to 120,000 gallons of Mineral Well Brine each year to maintain adequate dust control on the gravel surfaces with its jurisdiction. Typically, 3 park wide applications are done between the months of May and November. Applications are coordinated by the Park Project Manager and timed with grading operations.

- Application of Mineral Well Brine, 18% Calcium Chloride (Minimum), to gravel road surfaces and parking lots.
- Application must be done at rates ranging from 1,600 gal/pas/mile to 2,000 gal/pass/mile, depending on road conditions. Contractor must provide equipment that has the ability to change spread rates immediately at the request of the inspector as required by the job.
- Contractor must be able to provide dust control application to prepared road and parking lot surfaces within 24 hours of being notified.
- Contractor must be able to meet park specific application times to accommodate park operations.

- Contractor must have a 2,600 – 3,300 gallon truck for application to smaller areas such as parking lots, service drives and other tight turn radius areas. A 3,000 gallon pup is desirable to make application operations more efficient.
- At intersections and park entrance aprons, it will be required that the liquid be spread around the corners, or radii, and not just square with the intersecting road.
- Each unit shall be equipped with a calibrated pump capable of uniform application of the liquid, at the specified rate. The pump shall be driven either from the truck axle, or another method, to provide a direct relationship between the ground speed of the truck and the rate of pump application.
- Genesee County Parks reserves the right to inspect all application units, prior to award of a Purchase Order, to verify the units are adequate to perform the services outline in the bid document. If the application units are not adequately described in the bid response or, through inspection, they are found to be inadequate to provide the services outlined in this bid document; it shall be cause for the Genesee County Parks to reject the bid proposal.
- Non-uniform or otherwise unsatisfactory applications shall be re-applied at NO additional charge for the application (chloride will be paid for).
- Contractor must provide for direct communication between the driver of the application truck and the parks staff responsible for grading and preparing gravel surfaces for dust control applications.
- Before submitting a bid, the Contractor shall make sure that they are familiar with the facilities of the Genesee County Parks and satisfy itself as to the existing conditions.
under which they will be obliged to operate, or that in any way affects the work under this bid. No allowance shall be made subsequently in behalf of the Contractor for any negligence on his/her part.

- No sub-contracting is allowed.
- Pricing will be firm until the end of the Calendar year for which the Purchase Order was issued.
- The total delivered quantity may NOT exceed the Purchase Order without prior approval from the Genesee County Parks.
- Safety Data Sheets (SDS) must be submitted with the bid to be considered complete.
- The bid price shall include ALL costs involved in the furnishing, transportation, and applying of the material to the roadways and parking lots in an acceptable and accurate manner.

The County will enter into a one (1) year contract with the successful Contractor.
